Diabetic Supplies Benefit List	MISC-1
Ostomy Supplies Benefit List	MISC-4

APPENDICES

- Appendix I - Abbreviations
- Appendix II - Abbreviations of Manufacturers' Names
- Appendix III - Criteria for Coverage of Exception Status Drugs

PRODUCT INDEX

INTRODUCTION

The Nova Scotia Formulary details which drugs and supplies are benefits under the Nova Scotia Seniors' Pharmacare Program, Family Pharmacare Program, Diabetes Assistance Program, Community Services Pharmacare Programs and Drug Assistance for Cancer Patients.

Each pharmacy has been provided with a Formulary, as well as any physicians who specifically request a subscription. Updates will be issued semi-annually. An on-line searchable formulary is kept current and is available at www.nspharmacare.ca.

The ATC Classification System

All medications are classified according to the Anatomical Therapeutic Chemical (ATC) Classification System which is used by the World Health Organization for pharmacoepidemiological purposes and by the Patented Medicine Prices Review Board for pricing purposes.

The ATC Classification System groups chemically similar products according to their site of action and facilitates the comparison of new medicines with previously available medicines. There are fourteen main groups in the ATC system:

A	Alimentary tract and metabolism
B	Blood and blood forming organs
C	Cardiovascular system
D	Dermatologicals
G	Genito-urinary system and sex hormones
H	Systemic hormonal preparations, excluding sex hormones
J	General antiinfectives, systemic
L	Antineoplastic and immunomodulating agents
M	Musculo-skeletal system
N	Nervous system
P	Antiparasitic products, insecticides and repellents
R	Respiratory system
S	Sensory organs
V	Various

Each group is subdivided into anatomical, therapeutic and chemical subgroups as shown in the Legend.

A drug may be given more than one ATC code. If it is available in two or more strengths or formulations with clearly different therapeutic uses, the drug would appear in various categories depending on its different forms. If a drug has more than one clinical indication, the main indication is chosen for the listing of the various brands and strengths of this drug.

Interchangeability and Maximum Allowable Cost (MAC)

The Formulary indicates those products which have been deemed interchangeable by the Drugs and Therapeutics Committee of the Nova Scotia Department of Health (see the Legend). For generic products that meet the criteria for interchangeability a Maximum Allowable Cost (MAC) may be applied. The MAC for each interchangeable category with benefit status is based on the lowest priced brand within that category. The additional cost of a higher priced brand (usually the brand name product) is paid by the patient who may, for one reason or another, choose that brand. In the case of a documented adverse reaction to a particular brand, exceptions can be made to cover the cost of the brand product.

In addition, a special MAC is assigned to:

- certain groups of drugs that are similar in effect;
- specific services for which coverage is established;
- certain unit dose and special delivery formats that are also available in less expensive bulk formats; and
- certain supplies that are used for the same function.

The patient is required to pay the difference between the special MAC and the actual acquisition cost of the drug, supply or service.

Prescriber

The Formulary provides prescriber codes (see Legend) associated with each benefit under the Pharmacare Programs. These codes indicate which benefits will be reimbursed when prescribed by a specific prescriber.

The Nova Scotia Government Pharmacare Programs

1. **Seniors' Pharmacare Program** - available to all Nova Scotia seniors 65 years or older who have a valid Nova Scotia Health Card, and do not have private drug coverage.
2. **Community Services Pharmacare Programs** - The Department of Community Services provides drug benefits as part of the Income Assistance Programs (including Special Needs Pharmacare and Transitional Pharmacare), the Low Income Pharmacare Program for Children, Services for Persons with Disabilities and the Children in Care Programs. Eligibility is determined by the Department of Community Services.
3. **Drug Assistance for Cancer Patients**, an income based assistance program covering medication for the treatment of cancer.
4. **Diabetes Assistance Program**, an income based assistance program covering medication and supplies needed for diabetes treatment.
5. **Under 65-Long Term Care (LTC) Pharmacare**, provides drug coverage for long term care residents under 65 years of age who have no drug insurance.
6. **Family Pharmacare Program**, an income based program available to all Nova Scotians with a valid Nova Scotia Health Card who are not currently receiving drug benefits through Seniors', Community Services, Diabetes Assistance or the Under 65-Long Term Care Pharmacare Programs.

The benefit status of medications reimbursed under these programs are indicated, in the fourth column of the ATC classification, by the letters **S** (Seniors' Pharmacare), **F** (Community Services Pharmacare / Under 65-Long Term Care Pharmacare / Family Pharmacare), **C** (Drug Assistance for Cancer Patients), **D** (Diabetes Assistance) or **E** (Exception Status Drug - see Appendix III). If this column is blank, the product is not a benefit under any of these programs.

Miscellaneous Section

Diabetes and ostomy supplies are listed in this section. These products are benefits under the Seniors' and Community Services Pharmacare Programs and are cross-referenced in the appropriate ATC classification. Diabetes supplies are also benefits under the Diabetes Assistance Program.

Appendix III – Criteria for Coverage of Exception Status Drugs

Coverage of exception status drugs will be approved according to the following criteria upon review of a prescriber's written request. Included with the Nova Scotia Formulary are forms for Exception Status Drug requests, which may be used to facilitate the approval process.

As an alternative to sending a written request to the Pharmacare office, certain exception status drugs have been assigned criteria codes. To allow for on-line payment of these drugs, the criteria code may be provided by the prescriber on the prescription or confirmed by the pharmacist. The use of these codes offers the prescriber and the pharmacist access to immediate coverage for patients who clearly meet the exception status criteria. The criteria codes are indicated within the following exception criteria.

Abatacept (Orencia 250mg/vial Injection)

- for patients with severe active rheumatoid arthritis who have failed to respond to an adequate trial of an anti-TNF agent and not used in combination with other TNF antagonists
- for the treatment of children with juvenile idiopathic arthritis (JIA) who are intolerant to, or have not had an adequate response to etanercept
- initial treatment limited to a maximum of 16 weeks only
- retreatment in children who had an adequate initial response and subsequently experience a disease flare

Acamprosate (Campral 333mg Tablet)

- for treatment in patients who have been abstinent from alcohol for at least four days and who have contraindications to naltrexone (i.e., acute hepatitis, liver failure or currently receiving opioids)

Adalimumab (Humira 40mg/vial Injection)

- See *Anti-Tumor Necrosis Factor (TNF) Agents*

Adefovir Dipivoxil (Hepsera 10mg Tablet)

- in combination with lamivudine in patients who:
 - have developed failure to lamivudine (increase in HBV DNA of $\geq 1 \log_{10}$ iu/mL over the nadir measured on two separate occasions within an interval of at least one month, after the first 3 months of lamivudine therapy) and
 - when failure to lamivudine is not due to poor adherence to therapy
- coverage approved for 1 year

***Alendronate (Fosamax 10mg, 70mg, 40mg Tablet and generic brands)**

- for the treatment of osteoporosis associated with documented fragility fracture
- for the treatment of osteoporosis without documented fracture when the patient is at high 10 year fracture risk (using fracture risk tables)
- as prophylaxis of corticosteroid induced osteoporosis in a patient who will be or has been on systemic corticosteroid therapy for > 3 months
- for the treatment of Paget's disease of bone (6 month limit)
- other requests reviewed on case by case basis

***Alendronate, Vitamin D3, (Fosavance 70mg/5600IU)**

- for the treatment of osteoporosis associated with documented fragility fracture
- for the treatment of osteoporosis without documented fracture when the patient is at high 10 year fracture risk (using fracture risk tables)
- as prophylaxis of corticosteroid induced osteoporosis in a patient who will be or has been on systemic corticosteroid therapy for > 3 months

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Alglucosidase alfa (Myozyme 50mg Powder of Injection)

- for the treatment of infantile onset Pompe disease in patients who have had the onset of symptoms and confirmed cardiomyopathy before the age of 12 months *AND*
- participation in the long-term evaluation of the efficacy of treatment by periodic medical assessment as outlined in the monitoring of therapy guidelines
- initial approval is for 6 months. Continued coverage will be based on evaluation of the efficacy of treatment by regular medical assessment as outlined in the monitoring and discontinuation of therapy guidelines (available from the Pharmacare Office upon request)

Allergen Immunotherapy (Allergy Serum, Pollinex-R Injection)

- for immunotherapy with specific, standardized allergenic material, administered in high-dose schedules for carefully selected patients with a diagnosis of:
 - IgE mediated anaphylactic reactions to insect stings or
 - severe, seasonal (lasting two or more years) or perennial IgE dependent allergic rhinoconjunctivitis when optimal drug therapy and allergen avoidance have not been sufficiently effective in controlling symptoms or
 - IgE mediated allergic asthma, specifically those where there is a clear temporal association between exposure and signs and symptoms of asthma and when optimal drug therapy and avoidance measures have not been sufficiently effective in controlling symptoms

NOTE: The allergy serum must be dispensed from a pharmacy on prescription from a provider. Initial authorization is for two years, and can be continued for up to five years if improvement is noted.

Almotriptan (Axert 6.25mg, 12.5mg Tablet)

- See *Selective 5HT₁ - Receptor Agonists*

***Altretamine (Hexalen 50mg Capsule)**

- written request of an oncologist or prescriber with a specialty in oncology
- for the treatment of ovarian carcinoma

Ambrisentan (Volibris 5mg, 10mg Tablet)

- for the treatment of patients with at least Class III pulmonary arterial hypertension (PAH), either idiopathic or associated with connective tissue disease who have failed therapy with sildenafil or who have contraindications to sildenafil.
- diagnosis must be confirmed by right heart catheterization
- request must be from a PAH specialist

Anagrelide (Agrylin 0.5mg Capsule and generic brands)

Nova Scotia Seniors' Pharmacare Program:

- for the treatment of essential thrombocythemia (ET) in patients who have:
 - failed hydroxyurea therapy (does not provide sufficient platelet reduction) *or*
 - intolerable side effects from hydroxyurea therapy

Community Services Pharmacare Programs:

- for the treatment of essential thrombocythemia (ET) as an alternative to hydroxyurea

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Anti-Tumor Necrosis Factor (TNF) Agents (Adalimumab, Etanercept, Infliximab, Ustekinumab)

Ankylosing Spondylitis (Adalimumab, Etanercept)

- for the treatment of patients with moderate to severe ankylosing spondylitis (e.g., Bath AS Disease Activity Index (BASDAI) score ≥ 4 on 10 point scale) who:
 - have axial symptoms** and who have failed to respond to the sequential use of at least 2 NSAIDs at the optimum dose for a minimum period of 3 months observation or in whom NSAIDs are contraindicated OR
 - have peripheral symptoms and who have failed to respond to, or have contraindications to, the sequential use of at least 2 NSAIDs at the optimum dose for a minimum period of 3 months observation and have had an inadequate response to an optimal dose or maximal tolerated dose of a DMARD
 - must be prescribed by a rheumatologist or prescriber with a specialty in rheumatology
 - approval will be for a maximum of 6 months
 - requests for renewal must include information showing the beneficial effects of the treatment, specifically:
 - a decrease of at least 2 points on the BASDAI scale, compared with the pre-treatment score; OR
 - patient and expert opinion of an adequate clinical response as indicated by a significant functional improvement (measured by outcomes such as HAQ or "ability to return to work")

Maximum dosage approved:

Adalimumab - maximum dose of 40mg every two weeks and not in combination with other anti-TNF agents

Etanercept - maximum dose of 50mg per week and not in combination with other anti-TNF agents

**Patients with recurrent uveitis (2 or more episodes within 12 months) as a complication to axial disease, do not require a trial of NSAIDs alone.

Crohn's Disease (Adalimumab)

- for patients with moderate to severely active Crohn's disease who are:
 - refractory or with contraindications to an adequate course of 5-aminosalicylic acid and corticosteroids and other immunosuppressive therapy
 - initial reimbursement is restricted to an induction dose of 160mg followed by 80mg
 - clinical response to be assessed four weeks after the first induction dose and maintenance therapy approved in responders only at a dose not exceeding 40mg every two weeks

Crohn's Disease (Infliximab)

- for treatment of Crohn's disease in adults, when prescribed by a gastroenterologist or physician with a specialty in gastroenterology:
 - in patients with **moderate to severe active disease** refractory to 5-ASA products AND glucocorticoids (e.g., prednisone) AND immunosuppressive therapy (azathioprine or 6-mercaptopurine or methotrexate)**. Initial approval of infliximab will be for a single infusion of 5mg/kg/dose. A second infusion may be warranted in patients not responding to the first infusion or in patients responding initially but then worsening before maintenance therapy is effective. Request for approval beyond induction therapy will be considered case by case
 - in patients with **fistulizing disease** who have actively draining perianal or enterocutaneous fistula(e) that have recurred or persisted despite a course of appropriate antibiotic therapy (e.g. metronidazole +/-ciprofloxacin for a minimum of 3 weeks) AND immunosuppressive therapy (azathioprine or 6-mercaptopurine or methotrexate)**. Initial approval is for three infusions of infliximab of 5mg/kg/dose at 0, 2 and 6 week intervals

**Patients who are very ill and not candidates for surgery may qualify for infliximab therapy without a trial of AZA, 6-MP or MTX, as they may require a more rapid onset of response.

Juvenile Rheumatoid Arthritis (Etanercept)

- for the treatment of moderate to severely active, polyarticular juvenile rheumatoid arthritis in children (age 4-17) who have not responded to adequate treatment with one or more DMARDs for at least 3 months or have intolerance to DMARDs, and do not have a contraindication to etanercept

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Psoriasis (Adalimumab, Etanercept, Infliximab, Ustekinumab)

- for patients with severe, debilitating chronic plaque psoriasis (PsO) who meet all of the following criteria:
 - Body Surface Area (BSA) involvement of >10% and/or significant involvement of the face, hands, feet or genital region
 - failure to respond to, contraindicated to or intolerant of methotrexate and cyclosporine
 - failure to respond to, intolerant of or unable to access phototherapy
- written request of a dermatologist or prescriber with a specialty in dermatology
- continued coverage is dependent on evidence of improvement, specifically:
 - $\geq 75\%$ reduction in the Psoriasis Area and Severity Index (PASI) score, *or*
 - $\geq 50\%$ reduction in PASI with a ≥ 5 point improvement in DLQI (Dermatology Life Quality Index), *or*
 - significant reduction in BSA involved, with consideration of important regions such as the face, hands, feet or genital region
- concurrent use of biologics not approved

Initial duration and maximum dosage approved:

- Adalimumab* - initial approval for a maximum of 16 weeks
 - maximum dosage for ongoing coverage is 40mg every two weeks
- Etanercept* - initial approval for a maximum of 12 weeks
 - maximum dosage approved: 50mg biweekly x initial 12 weeks then 50mg weekly thereafter
- Infliximab* - initial approval for a maximum of 12 weeks
 - dosage restricted to infliximab 5mg/kg 0, 2 and 6 weeks then every 8 weeks
- Ustekinumab* - initial approval for a maximum of 16 weeks
 - dosage restricted to 45mg at 0, 4 and 16 weeks, response must be assessed prior to fourth dose
 - maintenance dosing every 12 weeks.

Psoriatic Arthritis (Adalimumab)

- for patients with active psoriatic arthritis who meet all of the following:
 - have at least three active and tender joints
 - have not responded to an adequate trial with two DMARDs or have an intolerance or contraindication to DMARDs
 - not used in combination with other TNF antagonists
- written request of a rheumatologist or prescriber with a specialty in rheumatology
- dosage restricted to a maximum of 40mg every 2 weeks
- coverage will be approved initially for 3 months. Can be reassessed for yearly coverage dependent on patient achieving an improvement in symptoms of at least 20%

Psoriatic Arthritis (Etanercept)

- for the treatment of active psoriatic arthritis in patients who have not responded to an adequate trial with two DMARDs or who have an intolerance or contraindication to DMARDs
- written request of a rheumatologist or prescriber with a specialty in rheumatology
- coverage will be approved initially for 3 months. Can be reassessed for yearly coverage dependent on patient achieving an improvement in symptoms of at least 20%

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Rheumatoid Arthritis (Adalimumab³, Etanercept, Infliximab)

- for patients with a diagnosis of active rheumatoid arthritis (RA) who
 - have not responded or who have had intolerable toxicity to an adequate trial¹ of combination therapy of at least two traditional DMARDs² or
 - if combination therapy is not an option, an adequate trial of at least three traditional DMARDs in sequence as monotherapy and
 - patients must have had an adequate trial¹ of leflunomide. Exceptions can be considered in cases where leflunomide is contraindicated or not tolerated
- therapy must include methotrexate alone or in combination unless contraindicated or not tolerated
- written request of a rheumatologist or prescriber with a specialty in rheumatology
- coverage will be approved initially for 6 months. Can be reassessed for yearly coverage dependent on patient achieving an improvement in symptoms of at least 20%

¹ An adequate trial is 5 months for IM gold, 6 months for penicillamine, 4 months for hydroxychloroquine and 3 months for all other traditional DMARDs as well as leflunomide, infliximab and etanercept.

² Traditional agents include methotrexate, IM gold, sulfasalazine, hydroxychloroquine, azathioprine, chloroquine, penicillamine and cyclosporine.

³ Dosage limited to 40mg every 2 weeks.

***Aprepitant (Emend 80mg, 125mg, Tri-Pack Capsules)**

- in combination with a 5-HT₃ antagonist and dexamethasone in adult cancer patients treated with chemotherapy that includes cisplatin as a single day therapy greater than or equal to (\geq) 70mg/m² to prevent acute and delayed nausea and vomiting.
 - aprepitant will only be used with single day cisplatin-based therapy \geq 70mg/m² (and not multiple day cisplatin chemotherapy)
 - aprepitant will not be used in patients receiving moderately emetogenic cancer chemotherapy or radiotherapy
 - the 5-HT₃ antagonist should only be used on the first day of cisplatin therapy with aprepitant continuing on Day 2 and Day 3

Artificial Tears, Preservative Free (Celluvisc, Refresh, Refresh Plus, Refresh Tears, Tears Naturale Free)

- for patients with the diagnosis of dry eye requiring frequent daily doses of artificial tears, to prevent sensitivity to preservatives or in patients in whom preservative sensitivity is suspected
- written request from an ophthalmologist or optometrist confirming the diagnosis will be required to initiate coverage

***Azithromycin (Zithromax POS 100mg/5mL, 200mg/5mL and 250mg, 600mg Tablet and generic brands)**

- for the treatment of pneumonia in clients over 65 years of age [**Criteria Code 65**]
- for the treatment of infections requiring a macrolide (including community acquired pneumonia in patients < 65 year of age) when there is documented intolerance to erythromycin [**Criteria Code 02**]
- for the treatment of infections when alternatives are not available due to documented patient allergies [**Criteria Code 03**]
- for the treatment of infections when alternatives are not available due to serious intolerance to other agents [**Criteria Code 04**]
- for the treatment of chlamydia trachomatis as a single dose of 1g (4 capsules) [**Criteria Code 05**]
- for the prevention of mycobacterium avium complex (MAC) [**Criteria Code 06**]
- for the treatment of infections requiring a macrolide antibiotic when the patient is taking medications that would interact with erythromycin [**Criteria Code 07**]
- for the treatment of moderate to severe exacerbations of chronic bronchitis [**Criteria Code 08**]

***Benzzydamine HCL (Tantum 0.15% Oral Rinse and generic brands)**

- for oncology patients only

Betahistine (Serc 16mg, 24mg Tablet and generic brands)

- for the symptomatic treatment of the recurrent episodes of vertigo associated with Meniere's disease

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Betamethasone, Calcipotriol (Xamiol 0.5mg/g/50mcg/g Gel)

- for the treatment of scalp psoriasis after:
 - failure of a topical steroid
 - the use of a topical steroid and calcipotriol together as single agents

Bosentan (Tracleer 62.5mg, 125mg Tablet)

- written initial request of a pulmonary arterial hypertension (PAH) specialist only
- diagnosis of PAH should be confirmed by right heart catheterization
- **IPAH (functional class III and IV)**
 - for the treatment of patients with World Health Organization (WHO) functional class III and IV idiopathic pulmonary arterial hypertension (IPAH) who do not demonstrate vasoreactivity on testing or who do demonstrate vasoreactivity on testing but fail a trial of calcium channel blockers (CCB) or are intolerant to CCB
- **PAH secondary to scleroderma, congenital heart disease or HIV (functional class III and IV)**
 - for the treatment of patients with World Health Organization (WHO) functional class III and IV pulmonary arterial hypertension (PAH) associated with scleroderma, congenital heart disease or HIV who do not respond to conventional therapy

Budesonide (Pulmicort Nebuamps 0.125mg/mL, 0.25mg/mL, 0.5mg/mL Suspension)

- See *Wet Nebulization Solutions*

Bumetanide (Burinex 1mg, 5mg Tablet)

- for diuresis in patients when treatment with furosemide is deemed inappropriate or ineffective

Buprenorphine and Naloxone (Suboxone 2mg/0.5mg, 8mg/2mg Sublingual Tablet)

- for the treatment of opioid dependence for patients in whom methadone is contraindicated (e.g., patients at high risk of, or with QT prolongation, or hypersensitivity to methadone)
- must be prescribed by a physician licensed to prescribe methadone for opioid dependence

Butorphanol (10mg/mL Nasal Spray, generic brands)

- for the treatment of migraine, upon the request of a neurologist, prescriber with a specialty in neurology or a specialist in pain management, when conventional forms of therapy are ineffective or inappropriate

Cabergoline (Dostinex 0.5mg Tablet & generic brand)

- for the treatment of micro- or macro-adenoma of the pituitary after failure of bromocriptine (as determined by prolactin levels) or if bromocriptine is not tolerated

Calcipotriol (Dovonex 50mcg/g Ointment, Cream and 50mcg/mL Scalp Solution)

- for use in psoriasis therapy when conventional therapies have been ineffective or inappropriate

***Calcitonin, Intranasal (Miacalcin 200iu Nasal Spray and generic brands)**

- for the treatment of osteoporosis associated with documented fragility fracture when alendronate, risedronate and raloxifene are not tolerated or are contraindicated
- for the treatment of osteoporosis without documented fracture when patient is at high 10 year fracture risk (using fracture risk tables) and alendronate, risedronate and raloxifene are not tolerated or are contraindicated
- for the treatment of pain associated with osteoporotic fragility fractures, bone metastases or pathological fractures (short term up to 3 months)
- other requests reviewed on case by case basis

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Capecitabine (Xeloda 150mg and 500mg Tablet)**

- for treatment of metastatic breast cancer as monotherapy in patients who have failed or cannot tolerate taxane-based therapy and who have an ECOG performance status of 0-2
- as a single agent in patients who have documented evidence of metastatic colorectal cancer, with an ECOG performance status of 0-2, who choose not to receive combination chemotherapy (5-FU/LV/irinotecan) and/or are unable to tolerate first line therapy. This includes patients who are chemotherapy naive or who have progressed 6 months after completion of adjuvant 5-FU/LV therapy
- for adjuvant treatment of patients with stage III (Dukes' C) colon cancer and ECOG status 0-1 when prescribed by an oncologist
- requests must be from an oncologist or a prescriber with a specialty in oncology only, and approval will be granted for three months, to be renewed as required; in stage III colon cancer, coverage approved for 6 months

Carvedilol (Coreg 3.125mg, 6.25mg, 12.5mg, 25mg Tablet and generic brands)

- for the treatment of stable symptomatic heart failure with systolic dysfunction (i.e., left ventricular ejection fraction (LVEF) less than or equal to 40%)

Cetirizine (Reactine 5mg, 10mg Tablet and generic brands)

- for chronic urticaria, defined as the presence of hives or lesions for longer than six weeks, which has responded to treatment with cetirizine

Cholinesterase Inhibitors (ChEI) (Donepezil, Galantamine, Rivastigmine)

- for the treatment of patients with a diagnosis of mild to moderate probable Alzheimer's Disease or possible Alzheimer's Disease with vascular component, with Lewy bodies or other (as specified) who meet the following criteria:
 - Initiation of coverage in a cholinesterase inhibitor (ChEI)-naive patient:
Coverage is provided for an initial 90 days when all the following criteria are met:
 - a Mini-Mental State Examination (MMSE) score of 10 to 30;
 - a Functional Assessment Staging Test (FAST) score of 4 to 5; and
 - three target symptoms have been established which will be monitored on an ongoing basis to assist in determining clinical meaningfulness
 - Continuation of coverage for a second 90-day period:
Coverage can be extended an additional 90 days if:
 - there is demonstrated stabilization or improvement in at least one target symptom after initial 90 days of therapy
 - Continuation of coverage for 6-month periods:
Coverage is continued in 6-month increments when:
 - the information provided indicates the patient is in the mild to moderate stage of Alzheimer's Disease
 - a MMSE and FAST score must be provided 6 months after starting a ChEI and then only annually thereafter
 - Initiation of coverage with a second ChEI for a patient who has previously taken no more than one other ChEI:
Coverage of a second ChEI can be provided for an initial 90 days if:
 - the reason for discontinuing the first ChEI is indicated; and
 - any changes in target symptoms are indicated

Coverage for a second ChEI is provided in the same manner as the first ChEI (i.e. 90-days, second 90-days, then continuation in 6-month periods if criteria are met).

NOTE : Specialized requests forms, which have been developed for each coverage period, must be submitted for continuation of coverage.

Ciprofloxacin, Ophthalmic (Ciloxan 0.3% Ophthalmic Solution and generic brands and Ointment)

- See *Fluoroquinolones, Ophthalmic*

***Ciprofloxacin, Oral (Cipro 100mg/mL Oral Liquid and 250mg, 500mg, 750mg Tablet and generic brands)**

- See *Fluoroquinolones, Oral*

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Ciprofloxacin XL, Oral (Cipro XL 1000mg Tablet)**

- for the oral treatment of gram-negative infections in complicated urinary tract infections, for which other oral agents are not effective or available **[Criteria Code 10]**
- for the oral treatment of acute uncomplicated pyelonephritis **[Criteria Code 11]**

Ciprofloxacin & Dexamethasone, Otic (Ciprodex Otic Suspension)

- for the treatment of patients with acute otitis media with otorrhea through tympanostomy tubes who require treatment **[Criteria Code 01]**
- for the treatment of patients with acute otitis externa in the presence of a tympanostomy tube or known perforation of the tympanic membrane **[Criteria Code 02]**

***Clarithromycin (Biaxin 250mg, 500mg, XL 500mg Tablet and 125mg/5mL, 250mg/5mL Oral Liquid and generic brands)**

- for the treatment of pneumonia in clients over 65 years of age **[Criteria Code 65]**
- for the treatment of infections requiring a macrolide (including community acquired pneumonia in patients <65 years of age) when there is a documented intolerance to erythromycin **[Criteria Code 02]**
- for the treatment of infections when alternatives are not available due to documented patient allergies **[Criteria Code 03]**
- for the treatment of infections when alternatives are not available due to serious intolerance to other agents **[Criteria Code 04]**
- for the eradication of *Helicobacter pylori* infections when used in combination regimens for the treatment of peptic ulcer disease **[Criteria Code 05]**
- for the prevention and treatment of mycobacterium avium complex (MAC) **[Criteria Code 06]**
- for the treatment of moderate to severe exacerbations of chronic bronchitis **[Criteria Code 07]**

Clopidogrel (Plavix 75mg Tablet)

- for the secondary prevention of the following vascular ischemic events in patients with a history of symptomatic atherosclerotic disease, including:
 - ischemic stroke/ transient ischemic attack (TIA) in patients with a documented severe allergy to ASA or who experience a recurrent thrombotic event (stroke, symptoms of TIA) while taking ASA or experience GI hemorrhage while on ASA,
 - myocardial infarction (MI) in patients with a documented severe allergy to ASA or experience GI hemorrhage while on ASA,
 - peripheral vascular disease in patients with a documented severe allergy to ASA or experience GI hemorrhage while on ASA,
 - unstable angina in patients with a documented severe allergy to ASA or experience GI hemorrhage while on ASA
- in patients with intravascular stent implantation, the coverage period following insertion is:
Bare Metal Stent(s) (BMS) - 30 days
Drug Eluting Stent(s) (DES) - 12 months

NOTE : The **[Criteria Code 30]** may be used for the initial 30 days coverage period for all types of intra coronary stent implantation. For coverage beyond the initial 30 day on-line approval a written request from the attending provider is required.

- for patients with non-ST-segment elevation acute coronary syndrome (ACS) (i.e., unstable angina or non-ST-segment elevation myocardial infarction), in combination with ASA, for a period of 3 months coverage. Coverage for 12 months is available for high risk patients:
 - with a second ACS within 12 months, or
 - with complex or extensive coronary artery disease (CAD) e.g., diffuse 3 vessel CAD not amenable to revascularization, or
 - who have had a previous stroke, TIA or symptomatic PAD
- other requests on a case by case basis

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Clostridium Botulinum Toxin Type A (Botox 100iu/vial Injection)

- for the treatment of the following Health Canada approved indications:
 - focal spasticity following stroke in adults
 - equinus foot deformity in cerebral palsy in patients 2 years of age and older
 - cervical dystonia
 - blepharospasm, hemifacial spasm (VII nerve disorder) and strabismus in patients 12 years of age and older

Clostridium Botulinum Type A (Xeomin 100u/vial)

- for the treatment of blepharospasm and cervical dystonia (spasmodic torticollis)

***Codeine, Sustained Release (Codeine Contin 50mg, 100mg, 150mg and 200mg Tablet)**

- for the treatment of mild to moderate chronic pain syndrome, if pain has been controlled by doses less than 200mg q12h
- patients may be considered candidates if they are achieving good pain control from immediate-release plain codeine preparations but prefer the convenience of a long acting preparation or patients who are achieving good pain control from acetaminophen or ASA plus codeine preparations but are limited by the acetaminophen content to no greater than 12 tablets per day
- not insured for the treatment of acute pain (e.g., post-operative pain)

Cromoglycate Sodium (pms-Sodium Cromoglycate 1% Nebulizer Solution)

- See *Wet Nebulization Solutions*

***Cyanocobalamin, Injection (Cyanocobalamin, Vitamin B₁₂ 100mcg/mL and 1000mcg/mL Injection)**

- for the treatment of documented cyanocobalamin deficiency, when the oral route is inappropriate or contraindicated (criteria applies to all Programs)

***Cyanocobalamin, Oral (Vitamin B₁₂ 500mcg and 1,000mcg Tablet)**

- for the treatment of documented cyanocobalamin deficiency in recipients of the Community Services Pharmacare Program, Family Pharmacare Program and Drug Assistance for Cancer Patients; oral cyanocobalamin is fully insured for Seniors' Pharmacare Program

***Cyanocobalamin, Oral in combination (Vitamin B₁₂ 1000mcg SL Tablet w Folic Acid)**

- for the treatment of documented cyanocobalamin deficiency in recipients of the Community Services Pharmacare Program, Family Pharmacare Program and Drug Assistance for Cancer Patients; oral cyanocobalamin is fully insured for Seniors' Pharmacare Program

Cyclosporine (Neoral 10mg, 25mg, 50mg, 100mg Capsule and 100mg/mL Oral Liquid and generic brands)

- for the treatment of severe psoriasis
- for the treatment of severe rheumatoid arthritis

***Darbepoetin (Aranesp Syringe Injection)**

- for the treatment of transfusion dependent patients with hematologic malignancies who have a baseline anemia of $\leq 90\text{g/L}$ and whose transfusion requirements are ≥ 2 units of packed red blood cells per month over 3 months
- initial approval for 12 weeks with the documentation of dose, hemoglobin and therapeutic outcome (number of transfusions)
- approval of further 12 week cycles are dependent on evidence of satisfactory clinical response or reduced treatment requirement to less than 2 units of PRBC monthly

NOTE: Specialized request forms are used to request coverage for darbepoetin.

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Darifenacin (Enablex 7.5mg, 15mg Tablet)

- See *Urinary Antispasmodics, Long-Acting*

Dasatinib (Sprycel 20mg, 50mg, 70mg Tablet)

- as a single agent for the treatment of adults with chronic, accelerated or blast phase chronic myelogenous leukemia (CML) and Philadelphia chromosome acute lymphoblastic leukemia (Ph⁺ ALL) with resistance or intolerance to prior therapy including imatinib
- coverage approved for 6 months

Deferasirox (Exjade 125mg, 250mg, 500mg Tablet for Suspension)

- for the treatment of patients who require iron chelation and deferoxamine is contraindicated

Desmopressin (DDAVP 0.1mg, 0.2mg Tablet, 100mcg/mL Drops and 10mcg/dose Nasal Spray and generic brands)

- for the management of nocturnal enuresis in children only

Dipyridamole & ASA (Aggrenox 200/25mg Capsule)

- for the secondary prevention of ischemic stroke/transient ischemic attack (TIA) in patients who have experienced a recurrent thrombotic event (stroke, symptoms of TIA) while taking ASA

***Dolasetron (Anzemet 50mg, 100mg Tablet)**

- See *Serotonin (5-HT₃) Antagonists*
Recommended dose is 100mg orally 1 hour pre-chemotherapy.

Donepezil (Aricept 5mg, 10mg Tablet)

- See *Cholinesterase Inhibitors (ChEI)*

Dronabinol (Marinol 2.5mg, 5mg Capsule)

- for the treatment of severe nausea and vomiting associated with cancer chemotherapy in patients who have failed a traditional stepwise approach to antiemetic therapy
- for second line treatment of acquired immune deficiency syndrome (AIDS)-related anorexia associated with weight loss

Duloxetine (Cymbalta 30mg, 60mg Capsule)

- for the treatment of neuropathic pain in diabetic patients who are unresponsive to adequate courses of two alternative agents; such as tricyclic antidepressants and anticonvulsants
- dose limited to a maximum of 60mg per day

Dutasteride (Avodart 0.5mg Capsule)

- for the treatment of benign prostatic hypertrophy when alpha antagonists are contraindicated or not tolerated

Entacapone (Comtan 200mg Tablet)

- for the treatment of Parkinson's disease as adjunctive therapy in patients who are not well controlled and are experiencing significant "wearing off" symptoms despite optimal therapy with a levodopa/decarboxylase inhibitor

Entecavir (Baraclude 0.5mg Tablet)

- for the treatment of chronic hepatitis B infection in patients with:
 - documented cirrhosis on radiologic or histologic grounds *AND*
 - a HBV DNA concentration above 2000iu/mL

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Epinephrine (Epipen 1:1000, Epipen Jr. 1:2000 Injection and Twinject 0.15mg, 0.3mg Auto-Injector)

- for the emergency treatment of anaphylactic reactions, when out of reach of immediate medical attention

NOTE: Coverage is limited to one unit at a time.

To allow for replacement of used or expired units, the pharmacist should contact the Pharmacare office and coverage will be provided on the day of the fill. Additional prescriber requests are not required for replacement units once the initial request has been approved.

***Erlotinib (Tarceva 100mg, 150mg Tablet)**

- as monotherapy for the treatment of patients with locally advanced or metastatic NSCLC after failure of at least one prior chemotherapy regimen and whose EGFR expression status is positive or unknown
- coverage approved for 6 months

***Erythropoietin (Eprex Multidose Vial and Syringe Injection)**

- for the treatment of transfusion dependent patients with hematologic malignancies who have a baseline anemia of $\leq 90\text{g/L}$ and whose transfusion requirements are ≥ 2 units of packed red blood cells per month over 3 months
- initial approval for 12 weeks with the documentation of dose, hemoglobin and therapeutic outcome (number of transfusions)
- approval of further 12 week cycles are dependent on evidence of satisfactory clinical response or reduced treatment requirement to less than 2 units of PRBC monthly
- if transfusion requirements increase to ≥ 2 units/ month (over a 3 month period), one dose increase may be attempted (maximum dose 60,000iu per week)

NOTE: Specialized request forms are used to request coverage for erythropoietin.

***Estradiol (Estrogel Topical Gel and Climara, Estraderm, Estradot Transdermal Patch and generic brands)**

***Estradiol/Norethindrone Acetate (Estracomb, Estalis, Estalis-Sequi Transdermal Patch)**

- for the treatment of menopausal symptoms in women who cannot tolerate the oral forms of hormone replacement therapy

Etanercept (Enbrel 25mg Powder for Injection and 50mg/mL Injection)

- See **Anti-Tumor Necrosis Factor (TNF) Agents**

Ezetimibe (Ezetrol 10mg Tablet)

- for the treatment of hypercholesterolemia, as adjunctive therapy with statins, in patients who have not reached treatment goals on maximum tolerated statin therapy alone
- for the treatment of hypercholesterolemia, as monotherapy, in patients who are intolerant to statins and, when appropriate, fibrates

Fenoterol (Berotec 1mg/mL Solution)

- See **Wet Nebulization Solutions**

***Fentanyl (Duragesic 12mcg/hr, 25mcg/hr, 50mcg/hr, 75mcg/hr, 100mcg/hr Transdermal System and generic brands)**

- for the treatment of malignant or chronic non-malignant pain in adult patients who were previously receiving continuous opioid administration (i.e., not opioid naive) or who are unable to take oral therapy

Finasteride (Proscar 5mg Tablet)

- for the treatment of benign prostatic hypertrophy (BPH) when alpha-antagonists are contraindicated, not tolerated or failed
- for the treatment of benign prostatic hypertrophy (BPH) in combination with an alpha-antagonist when alpha-antagonist therapy has been tried as monotherapy and a partial response has been observed

***Fluconazole (Diflucan POS 10mg/mL)**

- for the treatment of oropharyngeal candidiasis when nystatin has failed, or for systemic infections when oral tablets are not an option

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Fludarabine (Fludara 10mg Tablet)**

- for the treatment of chronic lymphocytic leukemia (CLL), in patients with an ECOG performance status of 0-2, when:
 - the patient has failed to respond or relapsed during or after previous therapy with an alkylating agent, and
 - intravenous administration is not desirable

Fluoroquinolones, Ophthalmic (Ciprofloxacin, Ofloxacin)

- for the treatment of eye infections upon the order of an ophthalmologist, ophthalmology resident, prescribing optometrist or other prescriber who has a specialty in ophthalmology [**Criteria Code 01**]

***Fluoroquinolones, Oral (Ciprofloxacin, Norfloxacin, Ofloxacin)**

- for the treatment of patients intolerant or allergic (hypersensitivity reaction) to all other effective oral agents [**Criteria Code 01**]
- for the treatment of aerobic, gram-negative infections which are resistant to other suitable oral agents [**Criteria Code 02**]
- for the oral treatment of multi-resistant, aerobic, gram-negative infections traditionally requiring parenteral therapy (e.g., osteomyelitis, complicated urinary tract infections, bacterial pneumonia in cystic fibrosis, prostatitis) for which other oral agents are not effective or available [**Criteria Code 03**]
- for infections due to *Pseudomonas aeruginosa* (ciprofloxacin is the preferred agent) [**Criteria Code 04**]
- for the treatment of necrotizing (malignant) otitis externa [**Criteria Code 05**]
- for the prevention of endophthalmitis in patients who have had cataract surgery involving an unplanned vitrectomy (ciprofloxacin) [**Criteria Code 06**]

***Fluoroquinolones, Respiratory (Levofloxacin, Moxifloxacin)**

- for the completion of therapy instituted in the hospital setting for the treatment of nosocomial pneumonia, community acquired pneumonia (CAP) or acute exacerbation of chronic bronchitis (AECB) [**Criteria Code 01**]
- for the treatment of severe pneumonia in nursing home patients [**Criteria Code 02**]
- for the treatment¹ of CAP in patients with comorbidity² upon radiographic confirmation of pneumonia, or who have failed first line therapies (macrolide, doxycycline, amoxicillin-clavulanate) [**Criteria Code 03**]
- for the treatment¹ of AECB in complicated patients³ who have failed treatment with one of the following: (amoxicillin, doxycycline, TMP-SMX, cefuroxime, macrolide, ketolide or amoxicillin-clavulanate) [**Criteria Code 04**]

¹ If treated with an antibiotic within the past 3 months choose an antibiotic from a different class.

² Comorbidity includes chronic lung disease, malignancy, diabetes, liver, renal or congestive heart failure, use of antibiotics or steroids in the past 3 months, suspected macroaspiration, hospitalization within last 3 months, HIV/AIDS, smoking, malnutrition or acute weight loss.

³ Complicated AECB defined as increased cough and sputum, sputum purulence and increased dyspnea and FEV₁ < 50% predicted or FEV₁ 50% - 65% and one of the following: ≥4 exacerbations per year, ischemic heart disease, chronic oral steroid use or antibiotic use in past 3 months

Formoterol (Foradil 12ug Capsule for Inhalation and Oxeze 6mcg/dose, 12mcg/dose Turbuhaler)

- See **Long-Acting Beta₂-Agonists**

Formoterol, in combination (Symbicort 100/6mcg, 200/6mcg Turbuhaler)

- See **Long-Acting Beta₂-Agonists/Inhaled Corticosteroids**

Galantamine (Reminyl ER 8mg, 16mg, 24mg Capsule and generic brands)

- See **Cholinesterase Inhibitors (ChEI)**

***Granisetron (Kytril 1mg Tablet and generic brands)**

- See **Serotonin (5-HT₃) Antagonists**

NOTE: Recommended dose is 2mg orally 1 hour pre-chemotherapy or 1mg 1 hour pre-chemotherapy and 1mg 12 hours post chemotherapy.

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Hydroxyzine (10mg, 25mg, 50mg Capsule, generic brands and Atarax Syrup)

- for chronic urticaria, defined as the presence of hives or lesions for longer than six weeks, which has responded to treatment with hydroxyzine

***Imatinib (Gleevec 100mg Capsule and 100mg, 400mg Tablet)**

- for the treatment of chronic myelogenous leukemia (CML), as a single agent, in patients who have documented evidence of Philadelphia chromosome positive CML, with an ECOG performance status of 0-2, and who are in blast crisis, accelerated phase, or chronic phase, or
- as secondary use in patients who demonstrate a hematologic relapse or cytogenetic progression after interferon-alpha (INF-a) therapy
- requests for other indications will be reviewed on a case by case basis
- written request of an oncologist required
- coverage approved for one year

Imiquimod (Aldara 5% Cream)

- for the treatment of external genital and perianal warts and condyloma acuminata in adults
- for the treatment of actinic keratosis on the head and neck in patients who have failed treatment with 5FU and cryotherapy

Infliximab (Remicade 100mg Powder for Injection)

- See *Anti-Tumor Necrosis Factor (TNF) Agents*

Insulin Aspart (NovoRapid 100iu/mL Penfill and Vial)

Insulin Glulisine (Apidra 3mL Prefilled Pen and 10mL Vial)

Insulin Lispro (Humalog Insulin and Cartridges)

- regular benefit for children 18 years and younger, under Community Services, Family Pharmacare and Diabetes Assistance Programs
- for the management of Type I and Type II diabetes mellitus in patients 19 years of age and older, who are:
 - undergoing intensive therapy, i.e., administering three or more injections of insulin per day including basal insulin, and
 - testing blood glucose levels 4-6 times per day

***Interferon alpha-2b (Intron-A Injection and Multidose Pen)**

- written request of an oncologist only
- for hairy cell leukemia
- for AIDS-related Kaposi's sarcoma
- for chronic hepatitis B or C
- for chronic myelogenous leukemia (CML)
- for thrombocytosis associated with CML
- for malignant melanoma
- for basal cell carcinoma

***Ipratropium Bromide (250mcg/mL Inhaled Solutions - see Formulary listings for product names)**

- See *Wet Nebulization Solutions*

***Ipratropium Bromide, in combination (Combivent Inhaled Solution and generic brands)**

- See *Wet Nebulization Solutions*

***Itraconazole (Sporanox 100mg Capsule)**

- for the treatment of severe systemic fungal infections
- for the treatment of severe or resistant fungal infections in immunocompromised patients
- for the treatment of severe onychomycosis caused by dermatophyte fungi as diagnosed by dermatologist, attending physician or prescriber with a specialty in dermatology

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Lactulose (667mg/mL Oral Liquid, generic brands)**

- for portal systemic encephalopathy
- for pneumatosis cystoides intestinalis

Lamivudine (Heptovir 100mg Tablet)

- for the treatment of hepatitis B, upon written request of a specialist
- therapy is approved for one year, with reassessment required at that time

Lansoprazole (Prevacid FasTab 15mg, 30mg Tablet and generic brands)

- for patients who meet the criteria for a proton pump inhibitor and require administration through a feeding tube

Lansoprazole (Prevacid 15mg, 30mg Capsule and generic brands)

- See **Proton Pump Inhibitors**

Lansoprazole, in combination (Hp-PAC)

- See **Proton Pump Inhibitors**

Leflunomide (Arava 10mg, 20mg Tablet and generic brands)

- written request of a rheumatologist or prescriber with a specialty in rheumatology
- for patients with a diagnosis of active rheumatoid arthritis (RA) who
 - have not responded or who have had intolerable toxicity to an adequate trial¹ of combination therapy of at least two traditional DMARDs² or
 - if combination therapy is not an option, an adequate trial of at least three traditional DMARDs in sequence as monotherapy.
- therapy must include methotrexate alone or in combination unless contraindicated or not tolerated
- coverage will be approved initially for 6 months. Can be reassessed for yearly coverage dependent on patient achieving an improvement in symptoms of at least 20%

¹ An adequate trial is 5 months for IM gold, 6 months for penicillamine, 4 months for hydroxychloroquine and 3 months for all other traditional DMARDs as well as leflunomide, infliximab and etanercept.

² Traditional agents include methotrexate, IM gold, sulfasalazine, hydroxychloroquine, azathioprine, chloroquine, D-penicillamine and cyclosporine.

Leukotriene Receptor Antagonists (Montelukast, Zafirlukast)

- for the treatment of moderate to severe asthma in adults and children who:
 - despite compliance are not adequately controlled with a moderate or high dose inhaled corticosteroid and require additional symptom control (e.g., cough, awakening at night, missing activities such as school, work or social activities because of asthma symptoms) and
 - require increasing amounts of short-acting beta2-agonists, indicative of poor control

Levetiracetam (Keppra 250mg, 500mg, 750mg Tablet and generic brands)

- as adjunctive therapy in the management of patients with epilepsy who are not satisfactorily controlled by conventional therapy

Levocarnitine (Carnitor 1g/5mL Injection, 100mg/mL Oral Liquid and 300mg Tablet)

- for the treatment of primary systemic carnitine deficiency

Levodopa and Carbidopa and Entacapone (Stalevo 50mg, 100mg, 150mg Tablet)

- for the treatment of Parkinson's disease as adjunctive therapy in patients who:
 - are not well controlled and are experiencing significant "wearing off" symptoms despite optimal therapy with levodopa/carbidopa
 - were not well controlled and experienced significant "wearing off" symptoms despite optimal therapy with levodopa/carbidopa and are currently using levodopa/carbidopa and entacapone separately

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Levofloxacin (Levaquin 250mg, 500mg Tablet and generic brands)**

- See *Fluoroquinolones, Respiratory*

Linezolid (Zyvoxam 600mg Tablet)

- written request of an infectious disease specialist or prescriber with a specialty in infectious diseases
- for the treatment of proven vancomycin-resistant *enterococci* (VRE) infections
- for the treatment of proven methicillin-resistant *staphylococcus aureus* or *epidermidis* (MRSA/MRSE) infections in those patients who are unresponsive to, or intolerant of vancomycin

Long-Acting Beta₂-Agonists (Formoterol, Salmeterol)

Long-Acting Beta₂-Agonists/Inhaled Corticosteroids (Formoterol, in combination; Salmeterol, in combination)

Asthma

- for the treatment of moderate to severe asthma in patients who:
 - are compliant with inhaled corticosteroids at a dose of any one of the following:
 - >500mcg/day CFC-beclomethasone dipropionate
 - >400mcg/day budesonide
 - >250mcg/day HFA-beclomethasone dipropionate or
 - >250mcg/day fluticasone propionate *and*
 - require additional symptom control, e.g., cough, awakening at night, missing activities such as school, work or social activities because of asthma symptoms; *and*
 - require increasing amounts of short-acting beta₂-agonists, indicative of poor control

Chronic Obstructive Pulmonary Disease

- for the treatment of chronic obstructive pulmonary disease (COPD), if symptoms persist after 2-3 months of short-acting bronchodilator therapy (i.e., salbutamol at a maximum dose of 8 puffs/day or ipratropium at maximum dose of 12 puffs/day)
- coverage can be provided without a trial of short-acting agent if:
 - there is spirometric evidence of at least moderate to severe airflow obstruction, i.e., postbronchodilator values FEV₁ < 60% and FEV₁/FVC ratio < 0.7, and significant symptoms i.e., MRC score of 3-5*
- combination therapy with tiotropium and a long-acting beta₂ agonist/inhaled corticosteroid will only be considered if:
 - there is spirometric evidence of at least moderate to severe airflow obstruction (postbronchodilator values FEV₁ < 60% and FEV₁/FVC ratio < 0.7), and significant symptoms i.e., MRC score of 3-5* *and*
 - there is evidence of one or more moderate-to-severe exacerbations per year, on average, for 2 consecutive years requiring antibiotics and/or systemic (oral or intravenous) corticosteroids

NOTE: Coverage of combination therapy with tiotropium and a long-acting beta₂ agonist (without an inhaled corticosteroid) will not be considered due to insufficient evidence to support substantial benefit.

If spirometry cannot be obtained, reasons must be clearly explained and other evidence regarding severity of condition must be provided for consideration (i.e., MRC scale). Spirometry reports from any point in time will be accepted.

*** Canadian Thoracic Society COPD Classification By Symptom/Disability:**

Moderate - (MRC 3-4) Shortness of breath from COPD causing the patient to stop after walking about 100 meters (or after a few minutes) on the level.

Severe - (MRC 5) Shortness of breath from COPD resulting in the patient being too breathless to leave the house or breathless after undressing, or the presence of chronic respiratory failure or clinical signs of right heart failure.

MRC= Medical Research Council Dyspnea Scale

Loratadine (Claritin 10mg Tablet and generic brands)

- for chronic urticaria, defined as the presence of hives or lesions for longer than six weeks, which has responded to treatment with loratadine

Magnesium Glucoheptonate (5mg/mL Solution and generic brands)

- for the treatment of hypomagnesemia

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Metformin and Rosiglitazone (Avandamet 1/500mg, 2/500mg, 4/500mg, 2/1000mg, 4/1000mg Tablet)

- for the treatment of type II diabetes in patients currently stabilized on equivalent strengths of metformin and rosiglitazone

***Methadone (Metadol 1mg, 5mg, 10mg, 25mg Tablet)**

- for the management of severe chronic or malignant pain as an alternative to other opiates
- written request of a physician authorized to prescribe methadone

***Methadone, Oral Liquid (Methadone Powder Compound and Metadol 1mg/mL, 10mg/mL Oral Liquid)**

- for the management of severe chronic or malignant pain as an alternative to other opiates
- for the management of patients undergoing therapy for drug dependence
- written request of a physician authorized to prescribe methadone

Methylphenidate (Biphentin 10mg, 15mg, 20mg 30mg, 40mg, 50mg, 60mg and 80mg Capsule)

- for patients 6-18 years of age diagnosed with attention deficit hyperactivity disorder (ADHD) who require 12-hour continuous coverage due to academic and/or psychosocial needs, and who meet the following:
 - patients who demonstrate significant and problematic disruptive behaviour or who have problems with inattention that interfere with learning *and*
 - prescribed by or in consultation with a specialist in pediatric psychiatry, pediatrics, general practitioners or other prescribers with expertise in ADHD *and*
 - have been tried on immediate release and slow release methylphenidate with unsatisfactory results

***Midazolam (1mg/mL, 5mg/mL Injection, generic brands)**

- for adjunctive therapy of pain management in palliative care patients outside the hospital setting [*Criteria Code 01*]

Midodrine (Amatine 2.5mg, 5mg Tablet and generic brands)

- for primary neurogenic types of idiopathic orthostatic hypotension, that is in the Bradbury-Eggleston or Shy-Drager Syndromes

Mometasone (Nasonex Nasal Spray)

- for the treatment of seasonal or perennial allergic rhinitis in patients ages 3 - 11 years only. For patients 12 years and older who require nasal steroids, the options for coverage include budesonide and beclomethasone which are fully insured

Montelukast (Singulair 4mg, 5mg Chewtabs, 4mg/pkt Granules and 10mg Tablets)

- See *Leukotriene Receptor Antagonists*

***Moxifloxacin (Avelox 400mg Tablet)**

- See *Fluoroquinolones, Respiratory*

Naltrexone (ReVia 50mg Tablet)

- for the treatment of alcohol dependence, as an adjunct to a comprehensive psychotherapeutic or psychological alcoholism counseling program to support abstinence, and reduce the risk of relapse
- eligibility is initially restricted to a three month period with reassessment at that time for further coverage

Naratriptan (Amerge 1mg, 2.5mg Tablet)

- See *Selective 5HT₁ - Receptor Agonists*

***Norfloxacin (400mg Tablet, generic brands)**

- See *Fluoroquinolones, Oral*

Ofloxacin, Ophthalmic (Ocuflox 0.3% Ophthalmic Solution and generic brands)

- See *Fluoroquinolones, Ophthalmic*

***Ofloxacin, Oral (Floxin 300mg, 400mg Tablet and generic brands)**

- See *Fluoroquinolones, Oral*

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Olanzapine (Zyprexa 2.5mg, 5mg, 7.5mg, 10mg, 15mg Tablet and generic brands)

- for the treatment of schizophrenia and related psychotic disorders upon the written request of a psychiatrist, either first line or upon failure of other antipsychotic agents
- for the acute treatment of manic or mixed episodes in bipolar I disorder in patients with intolerance or a history of failure to one other atypical antipsychotic
- for maintenance therapy in patients with bipolar disease who are currently stabilized on olanzapine

Olanzapine, Oral Disintegrating (Zyprexa Zydis 5mg, 10mg, 15mg, 20mg Tablet and generic brands)

- for the use in patients who meet the criteria for treatment with regular release oral olanzapine and who have difficulty swallowing

Omeprazole (Losec 10mg, 20mg Capsule/Tablet and generic brands)

- See **Proton Pump Inhibitors**

NOTE: Omeprazole is available as a full benefit if the dose does not exceed the standard dose of 20mg per day (maximum of 400 tablets/capsules per year). If the dosage is greater than 20mg per day then exception status will apply.

***Ondansetron (Zofran 4mg, 8mg Tablet, ODT Tablet and 4mg/5mL Oral Liquid and generic brands)**

- See **Serotonin (5-HT₃) Antagonists**

NOTE: Only requests for the oral dosage forms are eligible for consideration. Although the dose may vary, usually a single oral 8mg dose pre-chemotherapy is sufficient to control symptoms. As well, some patients may require additional therapy up to 48 hours after the last dose of chemotherapy or last radiation treatment. Benefit beyond 48 hours has not been established and, therefore, not insured.

Oseltamivir (Tamiflu 30mg*, 45mg*, 75mg Capsule, 12mg/mL Oral Suspension, 15mg/mL Oral Suspension Compounded PIN 00903521)

- for long-term care residents with clinically suspected or lab confirmed influenza A or B. A clinically suspected case is one in which the patient meets the criteria of influenza-like illness and there is confirmation of influenza A or B circulating within the facility or surrounding community
- prophylaxis of long term care residents where the facility has an influenza A or B outbreak
- treatment of patients with severe influenza-like illnesses (those who require hospitalization** due to illness) [**Criteria Code 20**]
- patients who are moderately ill with influenza-like illnesses (based on clinical judgment by evaluating the degree of fever and respiratory symptoms) and have risk factors***for influenza complications [**Criteria Code 21**]
- for pregnant patients with influenza-like illness symptom [**Criteria Code 22**]

**currently unavailable in community pharmacies*

*** inpatient doses would be provided by the hospital*

****risk factors are listed in the Influenza-Like Illness (ILI) toolkit available at www.gov.ns.ca/hpp*

Oxcarbazepine (Trileptal 60mg/mL Oral Liquid and 150mg, 300mg, 600mg Tablet and generic brands)

- for the treatment of epileptic seizures in patients who have had an inadequate response or are intolerant to at least three other formulary agents (prior or current use) including carbamazepine

Oxybutynin XL (Ditropan XL and Uromax 5mg, 10mg Tablet)

- See **Urinary Antispasmodics, Long-Acting**

***Oxycodone, Sustained Release (OxyContin 5mg, 10mg, 15mg, 20mg, 30mg 40mg, 60mg and 80mg Tablet)**

- for the treatment of moderate to severe chronic pain syndromes, as an alternative to morphine or hydromorphone
- not insured for the treatment of acute pain (e.g., post-operative pain)

Pantoprazole (Pantoloc 20mg, 40mg EC Tablet and generic brands)

- See **Proton Pump Inhibitors**

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Peginterferon alfa-2a (Pegasys 180mcg Injection)

- for the treatment of hepatitis C in patients who are treatment naive, upon the written request of a hepatologist or prescriber with a specialty in hepatitis
- a 24 week period will be initially approved at which time a further request will be required documenting the patient's response. If a positive response occurs, coverage can be continued for an additional 24 weeks (48 weeks total)
- for the treatment of HBeAg negative Chronic Hepatitis B (CHB) patients with compensated liver disease, liver inflammation and evidence of viral replication with demonstrated intolerance or failure to lamivudine therapy, upon written request of a hepatologist or prescriber with a specialty in hepatitis. Maximum duration of coverage is 48 weeks

Peginterferon alfa-2a and Ribavirin (Pegasys RBV Injection/Tablet)

- for the treatment of hepatitis C in patients who are treatment naive, upon the written request of a hepatologist or prescriber with a specialty in hepatitis
- a 24 week period will initially be approved at which time a further request will be required documenting the patient's response. If a positive response occurs, coverage can be continued for an additional 24 weeks (48 weeks total)

Peginterferon alfa-2b and Ribavirin (Pegatron and Pegatron Redipen Injection/Capsule)

- for the treatment of hepatitis C in patients who are treatment naive, upon the written request of a hepatologist or prescriber with a specialty in hepatitis
- a 24 week period will initially be approved at which time a further request will be required documenting the patient's response. If a positive response occurs, coverage can be continued for an additional 24 weeks (48 weeks total).

Pentoxifylline (Trental 400mg Tablet and generic brands)

- for the treatment of patients with ulcers due to ischemia of critical limbs

Pilocarpine, Oral (Salagen 5mg Tablet)

- for oncology patients only
- for the treatment of the symptoms of xerostomia due to salivary gland hypofunction caused by radiotherapy for cancer of the head and neck

Pioglitazone (Actos 15mg, 30mg, 45mg Tablet and generic brands)

- See *Thiazolidinediones*

Proton Pump Inhibitors (Pantoprazole, Lansoprazole, Omeprazole and Rabeprazole)

- for the treatment of symptomatic gastroesophageal reflux disease (GERD), erosive esophagitis, Barrett's esophagitis, peptic ulcer disease (PUD), ulcer prophylaxis for high risk patients (e.g., high risk NSAID users), Zollinger- Ellison Syndrome, Helicobacter pylori eradication

AND

For Pantoprazole and Lansoprazole

- A full benefit PPI (omeprazole or rabeprazole) is contraindicated or not tolerated

For Omeprazole and Rabeprazole (doses > 20mg daily)

- The patient remains symptomatic despite an adequate trial of a full benefit PPI (omeprazole and rabeprazole) at a dose of 20mg daily.

NOTE: Omeprazole and rabeprazole are available as full benefits if the dose does not exceed the standard dose of 20mg per day (maximum of 400 tablets/capsules per year). If the dosage is greater than 20mg per day then the criteria for coverage will apply.

The following coverage periods will apply:

- » Symptomatic GERD refractory to an adequate trial of a standard dose PPI or other reflux-associated indications (i.e., non-cardiac chest pain)

Coverage duration: 8 week trial followed by up to one year coverage

- » Erosive Esophagitis, Barrett's Esophagitis

Coverage duration: long term

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

- » Peptic Ulcer Disease (PUD)
 - Gastric/duodenal ulcers
 - Coverage duration: up to 12 weeks*
- » Ulcer prophylaxis for high risk patients (e.g., high risk NSAID users)
 - Coverage duration: 1 year with reassessment*
- » Zollinger- Ellison Syndrome
 - Coverage duration: long term*
- » Helicobacter pylori eradication
 - Combination therapy with antibiotics for 1 week duration [**Criteria Code 01**]

Quinagolide (Norprolac 0.025mg, 0.05mg, 0.075mg, 0.15mg Tablet)

- for the treatment of hyperprolactinemia (idiopathic or originating from a prolactin secreting micro or macro-adenoma of the pituitary) after failure of bromocriptine (as determined by prolactin levels) or if bromocriptine is not tolerated

Rabeprazole (Pariet 10mg, 20mg Tablet and generic brands)

- See **Proton Pump Inhibitors**

NOTE: Rabeprazole is available as a full benefit if the dose does not exceed the standard dose of 20mg per day (maximum of 400 tablets/capsules per year). If the dosage is greater than 20mg per day then exception status will apply.

Raloxifene (Evista 60mg and generic brands)

- for the treatment of postmenopausal osteoporosis associated with documented fragility fracture when bisphosphonates are not tolerated or are contraindicated
- for the treatment of postmenopausal osteoporosis without documented fractures when patient is at high 10 year fracture risk (using fracture risk tables) and bisphosphonates are not tolerated or are contraindicated
- other requests reviewed on case by case basis

Riluzole (Rilutek 50mg Tablet)

- for the treatment of amyotrophic lateral sclerosis (ALS) or Lou Gehrig's Disease, when initiated by a neurologist with expertise in the management of ALS when the patient has:
 - probable or definite diagnosis of ALS
 - ALS symptoms for less than five years
 - FVC >60% predicted upon initiation of therapy
 - no tracheostomy for invasive ventilation
- coverage to be reviewed every six months
- coverage cannot be renewed once the patient has a tracheostomy for the purpose of invasive ventilation or mechanical ventilation

***Risedronate (Actonel 5mg, 30mg, 35mg Tablet)**

- for the treatment of osteoporosis associated with documented fracture
- for the treatment of osteoporosis without documented fracture when patient is at high 10 year fracture risk (using fracture risk tables)
- as prophylaxis of corticosteroid induced osteoporosis in patient who will be or have been on systemic corticosteroid therapy for > 3 months
- Paget's disease of bone (2 month limit, one re-treatment course may be considered)
- other requests reviewed on case by case basis

Risperidone (Risperdal Consta 25mg/mL, 37.5mg/mL, 50mg/2mL Injection)

- for patients having problems with compliance on an oral antipsychotic or
- for patients who are currently receiving a conventional depot antipsychotic and are experiencing significant side effects (EPS or TD) or lack of efficacy

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Rituximab (Rituxan 10mg/mL Injection)

- for the treatment of adult patients with severe active rheumatoid arthritis who have failed to respond to an adequate trial with an anti-TNF agent
- cannot be used concomitantly with anti-TNF agents
- written request of a rheumatologist or prescriber with a specialty in rheumatology
- approval for re-treatment with rituximab will only be considered for patients who have achieved a response, followed by a subsequent loss of effect and, after an interval of no less than six months from the previous dose

Rivaroxaban (Xarelto 10mg Tablet)

- for the prophylaxis of venous thromboembolism following total knee replacement or total hip replacement, for up to two weeks, as an alternative to low molecular weight heparins
- dose limited to 10mg per day for up to two weeks supply only

Rivastigmine (Exelon 2mg/mL Oral Liquid and 1.5mg, 3mg, 4.5mg, 6mg Capsule and generic brands)

- See *Cholinesterase Inhibitors (ChEI)*

Rizatriptan (Maxalt 5mg, 10mg Tablets and 5mg, 10mg Wafers)

- See *Selective 5HT₁ - Receptor Agonists*

Rosiglitazone (Avandia 2mg, 4mg, 8mg Tablet)

- See *Thiazolidinediones*

***Saccharated Iron Oxide (Venofer 20mg/mL Injection)**

- for patients in whom parenteral iron is indicated and who have had a hypersensitivity or anaphylactic reaction to IV iron dextran

***Salbutamol (0.5mg/mL, 1mg/mL, 2mg/mL Unit Dose Inhaled Solution and 5mg/mL Inhaled Solution- see Formulary listings for product names)**

- See *Wet Nebulization Solutions*

***Salbutamol, in combination (Combivent Inhaled Solution and generic brands)**

- See *Wet Nebulization Solutions*

Salmeterol (Serevent 50mcg/dose Diskhaler and 50mcg/dose Diskus)

- See *Long-Acting Beta₂-Agonists*

Salmeterol in combination (Advair 50/100mcg, 50/250mcg, 50/500mcg Diskus and HFA 25/125 mcg/dose, HFA 25/250 mcg/dose Inhaler)

- See *Long-Acting Beta₂-Agonists/Inhaled Corticosteroids*

Selective 5HT₁ - Receptor Agonists (Almotriptan Tablets, Naratriptan Tablets, Rizatriptan Tablets & Wafers, Sumatriptan Nasal Spray, Zolmitriptan Tablets & Nasal Spray)

- for the treatment of migraine¹ headache of moderate² intensity when other therapies (e.g., NSAIDs, acetaminophen, DHE spray) are not effective, *AND* patients have not responded to oral sumatriptan.
- for the treatment of migraine¹ headache of severe² or ultra severe² intensity when patients have not responded to oral sumatriptan

NOTE: Coverage limited to 18 doses every 3 months³.

¹. As diagnosed based on current Canadian Guidelines

². Definitions: Moderate - pain is distracting causing need to slow down and limit activities; Severe - pain affects ability to concentrate and very difficult to continue with daily activities; Ultra severe - unable to speak or think clearly, not able to function, likely lying down or sleeping.

³. A quantity limit of 6 doses per month will be instituted for all clients. This will be adjudicated by limiting the quantity payable each quarter (e.g., Jan to Mar) to 18 doses*. Patients with >3 migraines/month who are on prophylactic therapy may qualify for additional doses, upon written request.

* Please note: One dose = one tablet, one wafer, one spray or one 0.5mL pre-filled syringe.

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Serotonin (5-HT₃) Antagonists (Dolasetron, Granisetron, Ondansetron)**

- for the treatment of emesis in patients who are:
 - receiving moderately or severely emetogenic chemotherapy [**Criteria Code 01**] or
 - receiving intravenous chemotherapy or radiotherapy and who have not experienced adequate control with other available antiemetics [**Criteria Code 02**] or
 - receiving intravenous chemotherapy or radiotherapy and who are experiencing intolerable side effects to other antiemetics, including steroids and anti-dopaminergic agents [**Criteria Code 03**]

NOTE: Use of criteria codes is limited to appropriate doses pre and post chemotherapy or radiation. Criteria codes must not be used for claims related to other causes of nausea and vomiting or for long term, daily management of nausea and vomiting.

Sevelamer (Renagel 800mg Tablet)

- upon the written request of a nephrologist or other prescriber within the Provincial Dialysis Program
- for the treatment of hyperphosphatemia (>1.8 mmol/L) and calciphylaxis (calcific arteriopathy) or hypercalcemia after failure on a magnesium-based binder

NOTE: The initial coverage will be for a three-month period. Renewals will be in six month intervals when there has been a significant reduction in phosphate levels (a decrease of more than 0.7mmol of phosphate).

Sildenafil (Revatio 20mg Tablet)

- written request of a pulmonary arterial hypertension (PAH) specialist only
- diagnosis of PAH should be confirmed by right heart catheterization
- dose of sildenafil will be limited to 20mg tid
- **IPAH (functional class III)**
 - for the treatment of patients with World Health Organization (WHO) functional class III idiopathic pulmonary arterial hypertension (IPAH) who do not demonstrate vasoreactivity on testing or who do demonstrate vasoreactivity on testing but fail a trial of calcium channel blockers (CCB) or are intolerant to CCB
- **PAH secondary to connective tissue disease (functional class III)**
 - for the treatment of patients with World Health Organization (WHO) functional class III pulmonary hypertension associated with connective tissue disease who do not respond to conventional therapy

Solifenacin (Vesicare 5mg, 10mg Tablet)

- See **Urinary Antispasmodics, Long-Acting**

Somatropin (Humatrope, Nutropin, Nutropin AQ, Saizen Injection)

- for treatment of growth hormone deficiency in patients with Turner Syndrome, upon the request of an endocrinologist or prescriber with a specialty in endocrinology

NOTE: The larger 8.8mg/vial format can be approved when suitable for dosing requirements if it does not result in drug wastage.

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Sorafenib (Nexavar 200mg Tablet)**

- as a single agent first line systemic therapy option in adult patients with a diagnosis of hepatocellular carcinoma (HCC) with Child-Pugh Class A liver dysfunction (mild hepatic impairment) with ECOG performance status 0-1; and who have either progression of disease, or who are not candidates for curative intent treatments (transplantation, hepatic resection), or other well established palliative interventions (ablation, transcatheter arterial chemo-embolization (TACE), internal radiation)
- as a single agent second line treatment in patients with documented evidence of histologically confirmed advanced or metastatic clear cell renal cell carcinoma, considered to be intermediate or low risk (according to Memorial Sloan-Kettering (MSKCC) prognostic score), have an ECOG performance status of 0 or 1 and progressed after prior cytokine therapy (or intolerance) within the previous 8 months. In any one patient all of the following conditions must be met:
 - Sorafenib may be a second line option only after cytokine therapy
 - Sorafenib may not be used after another tyrosine kinase inhibitor (i.e., sunitinib) as sequential therapy
 - In the event of severe toxicity within the first 8 weeks of therapy, a switch to another tyrosine kinase inhibitor (i.e., sunitinib) may be allowed
- coverage approved for 5 months with reassessment

Sumatriptan (Imitrex 50mg, 100mg Tablet and generic brands)

- for the treatment of migraine¹ headache when:
 - migraines are moderate² in severity and other therapies (e.g., NSAIDs, acetaminophen, DHE spray) are not effective, or
 - migraine attacks are severe² or ultra severe²

NOTE: Coverage limited to 18 doses every 3 months³.

¹. As diagnosed based on current Canadian Guidelines

². Definitions: Moderate - pain is distracting causing need to slow down and limit activities; Severe - pain affects ability to concentrate and very difficult to continue with daily activities; Ultra severe - unable to speak or think clearly, not able to function, likely lying down or sleeping.

³. A quantity limit of 6 doses per month will be instituted for all clients. This will be adjudicated by limiting the quantity payable each quarter (e.g., Jan to Mar) to 18 doses*. Patients with >3 migraines/month who are on prophylactic therapy may qualify for additional doses, upon written request.

* Please note: One dose = one tablet, one wafer, one spray or one 0.5mL pre-filled syringe.

Sumatriptan (Imitrex 6mg/syringe Injection)

- for the treatment of migraine¹ headache of moderate² intensity when other therapies (e.g., NSAIDs, acetaminophen, DHE spray) are not effective, AND oral and nasal triptans are not appropriate
- for the treatment of migraine¹ headache of severe² or ultra severe² intensity when oral and nasal triptans are not appropriate

NOTE: Coverage limited to 18 doses every 3 months³.

¹. As diagnosed based on current Canadian Guidelines

². Definitions: Moderate - pain is distracting causing need to slow down and limit activities; Severe - pain affects ability to concentrate and very difficult to continue with daily activities; Ultra severe - unable to speak or think clearly, not able to function, likely lying down or sleeping.

³. A quantity limit of 6 doses per month will be instituted for all clients. This will be adjudicated by limiting the quantity payable each quarter (e.g., Jan to Mar) to 18 doses*. Patients with >3 migraines/month who are on prophylactic therapy may qualify for additional doses, upon written request.

* Please note: One dose = one tablet, one wafer, one spray or one 0.5mL pre-filled syringe.

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

***Sunitinib (Sutent 12.5mg, 25mg, 50mg Capsule)**

- as a single agent first line treatment in patients with documented evidence of histologically confirmed advanced or metastatic clear cell renal cell carcinoma who have an ECOG performance status of 0 or 1. In any one patient all of the following conditions must be met:
 - Sunitinib may be a first line option
 - Sunitinib may not be used after another tyrosine kinase inhibitor (i.e., sorafenib) as sequential therapy.
 - In the event of severe toxicity within the first 8 weeks of therapy, a switch to another tyrosine kinase inhibitor (i.e., sorafenib) may be allowed
- as a single agent for the treatment of advanced gastrointestinal stromal tumor (GIST) patients after failure of imatinib due to intolerance or resistance
- coverage approved for 9 months with reassessment

Tacrolimus (Protopic 0.03%, 0.1% Ointment)

- for children greater than 2 years of age with refractory atopic dermatitis. Coverage will be renewed yearly
- for the intermittent use for moderate to severe atopic dermatitis in adults who have:
 - failed or are intolerant to a site appropriate strength of corticosteroid therapy (i.e., low potency on face versus intermediate to high potency for trunk and extremities)

Tazarotene (Tazorac 0.05%, 0.1% Gel)

- for use in psoriasis therapy when conventional therapies have been ineffective or inappropriate

***Temozolomide (Temodal 5mg, 20mg, 100mg, 200mg Capsule)**

- in combination with radiotherapy (concomitant therapy) and as adjuvant therapy (post radiation for 6 cycles) for newly diagnosed high grade glioma patients with a good performance status (PS) (Karnofsky \geq 60) and who choose to receive first line systemic chemotherapy
- use as a single agent may be considered for patients with recurrent high grade glioma and a good PS (Karnofsky \geq 60) who have not previously been treated with first line combination (temozolomide and radiation) therapy
- use as a single agent may be considered for patients with high grade glioma who have recurrent disease occurring during their initial adjuvant therapy. Other systemic treatment options such as etoposide, nitrosourea based therapy or a clinical trial should be considered for patients who recur immediately following temozolomide therapy. Rechallenge with temozolomide could be considered for patients with a temozolomide free interval of six months

Tenofovir disoproxil (Viread 300mg Tablet)

- for the treatment of chronic hepatitis B infection in patients with:
 - documented cirrhosis on radiologic or histologic grounds AND
 - a HBV DNA concentration above 2000iu/mL

Terbinafine (Lamisil 250mg Tablet and generic brands)

- for the treatment of severe onychomycosis caused by dermatophyte fungi as diagnosed by a dermatologist, attending provider, or a prescriber with a specialty in dermatology

Testosterone, topical (Androderm Patch, Androgel Gel Packet & Testim Gel)

- for the treatment of congenital and acquired primary or secondary hypogonadism in males with a specific diagnosis of:
 - Primary: cryptorchidism, Klinefelter's, orchidectomy, and other established causes
 - Secondary: pituitary-hypothalamic injury due to tumors, trauma, radiation
- deficiency should be clearly demonstrated by clinical features and confirmed by two separate biochemical tests before initiating any therapy

NOTE: Maximum dose approved is 5g per day or a 5mg patch per day.

This will be adjudicated by limiting the quantity payable each quarter (e.g. Jan-Mar) to:

- 120 Androderm Patches (2.5mg or 5mg Patch);
- 300g of Androgel 2.5g gel (packet);
- 600g of Androgel 5g gel (packet); or
- 600g of Testim Gel.

Please be reminded that topical gels are to be billed per gram (not per packet).

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Thiazolidinediones (Rosiglitazone, Pioglitazone and generic brands)

- for treatment of Type II diabetes in patients who have:
 - inadequate glycemic control¹ on optimal doses² of sulfonylurea and metformin; or
 - demonstrated intolerance or contraindication to metformin³ and are on optimal doses² of sulfonylurea; or
 - demonstrated intolerance or contraindication to sulfonylurea⁴ and are on optimal doses² of metformin; or
 - inadequate glycemic control¹ on optimal doses² of metformin and a BMI ≥ 27 . (A glitazone is recommended over a sulfonylurea (second line to metformin).)
- patients must have a recent A_{1C} of < 10% unless insulin therapy is inappropriate for the patient. Duration of initial approval will be 6 months; further coverage will require demonstrated evidence of efficacy (a reduction of A_{1C} of 0.7 observed to continue coverage)

¹ A_{1C} >7% and <10%

² Maximum doses: metformin 2000mg/day, glyburide 10mg bid

³ Metformin: Intolerance-GI adverse effects; Contraindications renal impairment or hepatic failure (cautious repaglinide use preferred to rosiglitazone in hepatic failure patients), acute or chronic metabolic acidosis.

⁴ Sulfonylureas: Intolerance - hypoglycemia; Contraindications - sulfa allergy, severe renal insufficiency

Thyrotropin (Thyrogen 0.9mg/mL Injection)

- to monitor for recurrence and metastatic disease, in patients who have documented evidence of thyroid cancer and who have undergone appropriate surgical and/or medical management. This includes:
 - primary use in patients with inability to raise an endogenous TSH level (≥ 25 mu/L) with thyroid hormone withdrawal
 - primary use in cases of documented morbidity in patients for whom severe hypothyroidism could be life-threatening
 - secondary use in patients with previous thyroid hormone withdrawal resulting in a documented life-threatening event
- as a single agent for the preparation of radioiodine remnant ablation in patients with papillary or follicular thyroid cancer who have undergone thyroidectomy as treatment for thyroid cancer
 - thyrotropin is a reasonable alternate to thyroid hormone withdrawal in patients who are unable to tolerate the prolonged hypothyroid state or who cannot achieve satisfactory elevation of endogenous TSH
 - thyrotropin may be used in new patients or patients with previously incomplete remnant ablation or who have a recurrence of thyroid cancer and require therapeutic remnant ablation

Ticlopidine (Ticlid 250mg Tablet and generic brands)

- for the secondary prevention of ischemic stroke or transient ischemic attack (TIA) in patients with a documented severe allergy to ASA or who experience a recurrent thrombotic event (stroke, symptoms of TIA) while taking ASA [Criteria Code 01]
- for the prevention of thrombosis in patients post intracoronary stent implantation for a period of up to 30 days following insertion [Criteria Code 02]
- other requests on a case by case basis

Tiotropium Bromide (Spiriva 18mcg Cap for Inhalation)

- for the treatment of chronic obstructive pulmonary disease (COPD), if symptoms persist after 2-3 months of short-acting bronchodilator therapy (i.e., salbutamol at a maximum dose of 8 puffs/day or ipratropium at maximum dose of 12 puffs/day)
- coverage can be provided without a trial of short-acting agent if:
 - there is spirometric evidence of at least moderate to severe airflow obstruction, i.e., postbronchodilator values FEV1 < 60% and FEV1/FVC ratio < 0.7, and significant symptoms i.e., MRC score of 3-5**
- combination therapy with tiotropium and a long-acting beta2 agonist/inhaled corticosteroid will only be considered if:
 - there is spirometric evidence of at least moderate to severe airflow obstruction (postbronchodilator values FEV1 < 60% and FEV1/FVC ratio < 0.7), and significant symptoms i.e., MRC score of 3-5** and
 - there is evidence of one or more moderate-to-severe exacerbations per year, on average, for 2 consecutive years requiring antibiotics and/or systemic (oral or intravenous) corticosteroids

NOTE: Coverage of combination therapy with tiotropium and a long-acting beta₂ agonist (without an inhaled corticosteroid) will not be considered due to insufficient evidence to support substantial benefit.

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

If spirometry cannot be obtained, reasons must be clearly explained and other evidence regarding severity of condition must be provided for consideration (i.e., MRC scale). Spirometry reports from any point in time will be accepted.

****Canadian Thoracic Society COPD Classification By Symptom/Disability:**

Moderate - (MRC 3-4) Shortness of breath from COPD causing the patient to stop after walking about 100 meters (or after a few minutes) on the level.

Severe - (MRC 5) Shortness of breath from COPD resulting in the patient being too breathless to leave the house or breathless after undressing, or the presence of chronic respiratory failure or clinical signs of right heart failure.

MRC= Medical Research Council Dyspnea Scale

Tizanidine (Zanaflex 4mg Tablet & generic brand)

- for the treatment of spasticity resulting from traumatic brain injury, multiple sclerosis (MS), spinal cord injury (SCI) or cerebral vascular accident (CVA) in patients whom baclofen is not indicated, ineffective or not tolerated

Tolterodine (Detrol 1mg, 2mg and Detrol LA 2mg, 4mg Tablet)

- See **Urinary Antispasmodics, Long-Acting**

Topiramate (Topamax 25mg, 100mg, 200mg Tablet and generic brands and Topamax 15mg, 25mg Sprinkle Capsule)

- for adjunctive management of epilepsy not satisfactorily controlled by conventional therapy

Tretinoin (Vitamin A Acid Topical Preparations)

- regular benefit under Community Services and Family Pharmacare Programs
- exception status drug under Seniors' Pharmacare Program, for treatment of actinic keratosis

Trospium (Trosec 20mg Tablet)

- See **Urinary Antispasmodics, Long-Acting**

Tryptophan (Tryptan 500mg Capsule and 500mg, 750mg, 1g Tablet and generic brands)

- as an adjunct for the treatment of depression in the management of patients suffering from bipolar affective disorders

Urinary Antispasmodics, Long-Acting (Darifenacin, Oxybutynin XL, Tolterodine, Trospium, Solifenacin)

- for the treatment of over-active bladder (not stress incontinence) after a reasonable trial of oxybutynin immediate-release (IR) is not tolerated
- a three month trial will be approved initially with assessment of the effectiveness of this therapy required if further coverage is considered

Ursodiol (Urso 250mg, DS 500mg Tablet)

- for dissolution of radiolucent, noncalcified gallstones of less than 20mm size for patients who cannot undergo a cholecystectomy
- for management of cholestatic liver disease such as primary biliary cirrhosis

Ustekinumab (Stelara 45mg/0.5mL Injection)

- See **Anti-Tumor Necrosis Factor (TNF) Agents**

Valganciclovir (Valcyte 450mg Tablet)

- for the treatment of cytomegalovirus (CMV) retinitis in HIV-positive patients, upon the request of an infectious disease specialist or prescriber with a specialty in infectious disease
- for the prevention of CMV disease post kidney, heart, liver or kidney-pancreas transplantation in patients at high-risk (D+ / R-) (i.e., donor positive/recipient negative)
- coverage will be for a maximum of 90 days

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

Vancomycin (Vancocin 125mg, 250mg Capsule)

- for the treatment of pseudomembranous colitis (PMC) when patients have not responded to initial therapy with metronidazole, or for initial treatment of severe PMC, or when drug interactions or intolerance prevent the use of metronidazole [Criteria Code 01]

Verteporfin (Visudyne 15mg/vial Injection)

- for the treatment of wet age-related macular degeneration (AMD) as prescribed by an authorized ophthalmologist [Criteria Code 01]

Vigabatrin (Sabril 0.5g Sachet and 500mg Tablet)

- for adjunctive management of epilepsy not satisfactorily controlled by conventional therapy

Vitamin B₁₂, Injection

- See *Cyanocobalamin, Injection*

Vitamin B₁₂, Oral

- See *Cyanocobalamin, Oral*

Voriconazole (Vfend 50mg, 200mg Tablet)

- for the treatment of patients with invasive aspergillus
- for the treatment of invasive candidiasis (proven on culture) with documented resistance to fluconazole

Wet Nebulization Solutions (Budesonide, Cromoglycate Sodium, Fenoterol, Ipratropium Bromide, Salbutamol)

- for adult patients with a vital capacity of 900mL or less
- for adult patients with a respiratory rate greater than 25 breaths/minute
- for patients who have demonstrated they cannot follow instructions, cannot hold the spacer device or cannot hold the device long enough to actuate it
- other requests reviewed on a case by case basis

Zafirlukast (Accolate 20mg Tablet)

- See *Leukotriene Receptor Antagonists*

Zanamivir (Relenza 5mg Powder for Inhalation)

- for patients with severe influenza-like illnesses (those who require hospitalization* due to illness) [Criteria Code 20]
- patients who are moderately ill with influenza-like illnesses (based on clinical judgment by evaluating the degree of fever and respiratory symptoms) and have risk factors**for influenza complications. [Criteria Code 21]
- pregnant patients with influenza-like illness symptoms. [Criteria Code 22]

*inpatient doses would be provided by the hospital

**risk factors are listed in Influenza-Like Illness (ILI) toolkit available at www.gov.ns.ca/hpp

Ziprasidone (Zeldox 20mg, 40mg, 60mg, 80mg Capsule)

- for the treatment of schizophrenia and schizoaffective disorder

Zoledronic Acid (Aclasta 5mg/100mL Injection)

- for the treatment of Paget's disease

Zolmitriptan (Zomig, Zomig Rapimelt 2.5mg Tablet)

- See *Selective 5HT₁ - Receptor Agonists*

NOTE: Exception status drugs for the Drug Assistance for Cancer Patients are indicated by an asterisk (*).

REQUEST FOR COVERAGE OF ANTI-TNF AGENTS FOR PSORIASIS

PATIENT INFORMATION

PATIENT'S SURNAME	PATIENT'S GIVEN NAME	HEALTH CARD NUMBER	DATE OF BIRTH
-------------------	----------------------	--------------------	---------------

REQUEST FOR INITIAL COVERAGE

DIAGNOSIS:

Patient has severe debilitating chronic plaque psoriasis as defined by:

☐ Body Surface Area (BSA) involvement > 10%

AND/OR ☐ Significant involvement of the face, hands, feet or genital region

REQUESTED DRUG NAME AND DOSE:

☐ Adalimumab (Humira®) Dose _____
 - initial approval for a maximum of 16 weeks
 - maximum dosage for ongoing coverage is 40mg q 2 weeks

☐ Infliximab (Remicade®) Dose _____
 - initial approval for a maximum of 12 weeks
 - dosage restricted to 5mg/kg at 0, 2 and 6 weeks - then every 8 weeks thereafter

☐ Etanercept (Enbrel®) Dose _____
 - initial approval for a maximum of 12 weeks
 - maximum dosage approved: 50mg biweekly x initial 12 weeks then 50mg weekly thereafter

☐ Ustekinumab (Stelara®) Dose _____
 - initial approval for a maximum of 16 weeks
 - dosage restricted to 45mg at 0, 4, and 16 weeks - then every 12 weeks thereafter

PATIENT'S PAST MEDICATION HISTORY:

(If completed on a previous request, provide update information only.)

AGENTS TRIED:

LENGTH OF THERAPY & OUTCOME:

(i.e., intolerant, not effective, etc.)

<input type="checkbox"/> Methotrexate	_____
<input type="checkbox"/> Cyclosporine	_____
<input type="checkbox"/> Phototherapy	_____

PATIENT'S CURRENT THERAPY:

REQUEST FOR COVERAGE OF ANTI-TNF AGENTS FOR PSORIASIS

PATIENT INFORMATION			
PATIENT'S SURNAME	PATIENT'S GIVEN NAME	HEALTH CARD NUMBER	DATE OF BIRTH
REQUEST FOR <u>CONTINUATION</u> OF COVERAGE			
Drug Name and Dosage:			
<input type="checkbox"/> Patient achieved a $\geq 75\%$ reduction in Psoriasis Area Severity Index (PASI) score, OR <input type="checkbox"/> Patient achieved a $\geq 50\%$ reduction in PASI with a ≥ 5 point improvement in Dermatology Life Quality Index, OR <input type="checkbox"/> Significant reduction in BSA involved, with considerations of important regions such as the face, hands, feet or genital region			
<u>ADDITIONAL COMMENTS:</u>			
PHYSICIAN'S NAME & ADDRESS:		<div style="display: flex; justify-content: space-between; align-items: flex-end;"> <div style="width: 40%;">CPSNS #: _____</div> <div style="width: 30%;">PHYSICIAN'S SIGNATURE _____</div> <div style="width: 30%;">DATE _____</div> </div>	

CRITERIA FOR COVERAGE OF ANTI-TUMOR NECROSIS FACTOR AGENTS FOR PSORIASIS

- for patients with severe, debilitating chronic plaque psoriasis (PsO) who meet all of the following criteria:
 - Body Surface Area (BSA) involvement of $>10\%$ and/or significant involvement of the face, hands, feet or genital region
 - failure to respond to, contraindicated to or intolerant of methotrexate and cyclosporine
 - failure to respond to, intolerant of or unable to access phototherapy
- written request of a dermatologist or prescriber with a specialty in dermatology
- continued coverage is dependent on evidence of improvement, specifically:
 - $\geq 75\%$ in the Psoriasis Area and Severity Index (PASI) score, or
 - $\geq 50\%$ reduction in PASI with a ≥ 5 point improvement in DLQI (Dermatology Life Quality Index), or
 - significant reduction in BSA involved, with consideration of important regions such as the face, hands, feet or genital

Concurrent use of biologics is not approved.

Initial duration and maximum dosage approved:

- Adalimumab* - initial approval for a maximum of 16 weeks
 - maximum dosage for ongoing coverage is 40mg every two weeks

CRITERIA FOR COVERAGE

Coverage will be approved initially for 6 months and can be reassessed for yearly coverage dependent on patient achieving an improvement in symptoms of at least 20%.

Leflunomide:

- written request of a rheumatologist or prescriber with a speciality in rheumatology
- for patients with a diagnosis of active rheumatoid arthritis (RA) who:
 - have not responded or who have had intolerable toxicity to an adequate trial¹ of combination therapy of at least two traditional DMARDs² or
 - if combination therapy is not an option, an adequate trial of at least three traditional DMARDs in sequence as monotherapy
- therapy must include methotrexate alone or in combination unless contraindicated or not tolerated

Anti-Tumor Necrosis Factor Agents: (Adalimumab³, Etanercept, Infliximab)

- written request of a rheumatologist or prescriber with a specialty in rheumatology
- for patients with a diagnosis of active rheumatoid arthritis (RA) who:
 - have not responded or who have had intolerable toxicity to an adequate trial¹ of combination therapy of at least two traditional DMARDs² or
 - if combination therapy is not an option, an adequate trial of at least three traditional DMARDs in sequence as monotherapy and
 - patients must have had an adequate trial of leflunomide¹. Exceptions can be considered in cases where leflunomide is contraindicated or not tolerated
- therapy must include methotrexate alone or in combination unless contraindicated or not tolerated
